

Sharp Continues to Enhance Security Offerings with New Common Criteria DSK

As an industry leader in **Document and Data Security**, Sharp is pleased to announce the optional **MX-FR33 Common Criteria/ISO 15408, EAL3-certified Data Security Kit** for the **MX-4110N, MX-4111N, MX-5110N, and MX-5111N** color MFPs.

Sharp makes it easy for virtually any business or government entity to safely deploy digital copying, printing, scanning and faxing. For maximum data protection, the optional Common Criteria Data Security Kit offers features such as:

- ✓ **Data Overwrite On-demand and at Power Up**
- ✓ **Incorrect Password Lockout**
- ✓ **Restricted Status Display**
- ✓ **Restricted List Printing**

These scalable security offerings aim to protect your intellectual property, preserve confidential information and help your business to meet regulatory requirements, such as the Health Insurance Portability and Accountability Act (HIPAA) and the Gramm Leach Bliley Act (GLB).

Additional **standard security features** on the **MX-4110N/4111N/5110N/5111N** include:

- ✓ **Automatic Data Overwrite & Encryption** to help protect everyday document data using **AES (Advanced Encryption Standard) 256-bit encryption**.
- ✓ **End-of-Lease** feature overwrites all data, including document filing, user data, job status, date and address book.
- ✓ **Account Management** to set authority groups to control usage costs
- ✓ **User Authentication** to protect your office from unauthorized communications
- ✓ **SSL Encryption** for maximum security by restricting access to your MX-4110N/4111N/5110N/5111N over your network
- ✓ **Confidential Printing** to help protect direct print documents from unauthorized viewing

Sharp takes a comprehensive approach to security by offering protection at every step in the document lifecycle. Fully scalable, Sharp's security offerings enable Information Technology (IT) personnel to confidently safeguard their infrastructure and MFP installed base, with virtually no impact to network traffic or workgroup productivity.

Optional Common Criteria Data

Security Kit

Data Security Kit Model	MFP Model	Availability	Data Encryption	Data Overwrites	Number of Overwrites
MX-FR33	MX-4110N	Now	256-bit AES	Y	Up to 7
MX-FR33	MX-4111N	Now	256-bit AES	Y	Up to 7
MX-FR33	MX-5110N	Now	256-bit AES	Y	Up to 7
MX-FR33	MX-5111N	Now	256-bit AES	Y	Up to 7

The Sharp Advantage

Sharp was the first to address security in digital imaging and received the first Common Criteria validation for an MFP in 2001. Since then, Sharp has been regarded as one of the industry's security innovators. With a Sharp MFP and Data Security Kit, both users and administrators can rest assured that Sharp is helping keep their confidential information secure.

Sharp continues to strengthen its product offerings with the very best in leading technology, features and value. The new **MX-FR33 Common Criteria Data Security Kit** offers security features to keep up with today's busy office environments.

Sincerely,

Shane Coffey
