

SHARP®

DEVICE TYPE REFERENCE GUIDE

SHARP'S GOLD-LEVEL MEMBERSHIP IN THE SAP® PRINTER VENDOR PROGRAM ENSURES SHARP DEVICE COMPATIBILITY WITH SAP'S ENTERPRISE RESOURCE PLANNING SOLUTIONS

Device types are analogous to print drivers for Microsoft® Windows®-based operating systems and PPDs (PostScript® Printer Descriptions) for Apple® Macintosh® and Linux®/UNIX® OSes. A device type is a file that contains MFP or printer information. When installed in an SAP environment, a device type allows users to seamlessly access device features such as paper tray selections, orientation, and duplexing options—directly from the SAP application.

Sharp is proud to be a gold-level member of the SAP Printer Vendor program. As a gold-level member, Sharp works closely with SAP to ensure compatibility of our MFP and printer device types with SAP's Enterprise Resource Planning (ERP) solutions.

Device types are available to SAP system owners and administrators by logging into the **SAP Service Marketplace** at <http://service.sap.com/support>. In addition, SAP Note 1135036 provides detailed descriptions and operating parameters of the latest device types for Sharp models; SAP Note 8928 provides device type information for older Sharp models. (SAP Notes are available from the SAP Service Marketplace.)

Device types are designed for SAP R/3 4.5B or later.

Additional print options available when printing SAPScript or Smart Forms documents require:

- SAP_BASIS 6.20 SP63 and higher
- SAP_BASIS 6.40 SP21 and higher
- SAP_BASIS 7.00 SP14 and higher
- SAP_BASIS 7.10 Standard

Status feedback is available using SNMP with:

- SAP_BASIS 7.00 Enh1 and higher
- SAP_BASIS 7.10 Enh1 and higher
