

Page Coverage / Yield Samples

August 25, 2015

By TK Hollberg

Most manufacturers base toner yield on 5% mono coverage and 15% color coverage. You'll notice in the attached PDF samples below that 5% mono prints are just over half a page of text; 15% color coverage happens simply when a logo is printed on the page. Please use these to understand how much toner or ink is being used.
